

Koss model esp-6 electrostatic stereophones deliver a sound never before possible in headphones!

3 Octaves of Sound beyond the limits of ordinary voice-coil and cone-type driver elements—this wide range is reachable only through electrostatics.

World's first Self-Energized Electrostatics—Easy to use—You just plug-in like other headphones. No special amplifiers or power supplies needed.

The sound of Koss ESP-6 headphones is as new and unique an experience as the very first time you heard the sound of Koss Stereophones. Remember the dramatic and expansive sound? Like nothing you ever heard before. And now Koss has done it again.

Through the development of the world's first electrostatic driver element for headphones, Koss engineers have created a sound lively in its own reality; smooth and relaxing in character. It is a sound beyond the limits of ordinary voice coil-and-cone-type

driver elements. It is a sound reachable only through electrostatics.

Through the development of practically weightless, self-energized diaphragms never before possible for headphone uses, Koss engineers have eliminated the moving cone driver element to achieve a frequency response obtainable in the past only through the use of complex electrostatic speakers like the Koss-Acoustech X system. And only now have Koss engineers been able to employ these techniques for headphone listening. And to prove

World's first wide-range electrostatic driver elements for headphones. Give smooth, peak-free, relaxing performance.

Dynamic Level Indicator in each cup light lights up, protects against very high sound pressure levels to give long, trouble-free listening pleasure.

it, an individual machine-run response curve comes packed with each headset. Dramatic Koss ESP-6 Electrostatic Stereophones feature a dynamic level indicator in each earcup to protect against overload when signal reaches very high sound pressure levels. Constructed with earpieces of sturdy, high impact plastic, coiled cord extending to 10 feet, comfortable foam rubber headband, and fluid-filled ear cushions for effective seal, the ESP-6 will withstand rugged use required by professional recording. Yet uniformly reliable and superb sound reproduction need not be sacrificed.
