01/ ISOLATION BASES

THESE BASES CAN BE PLACED IN ANY COMPONENTS OR SPEAKERS TO IMPROVE PERFORMANCE. Price includes 4 stainless steel bases set, 4 speeks, 4 teflon bases, 4 neoprene bases, 4 beech wood bases and box. " Please specified spike diameter before ordering".

- Isolator base Ø 30mm
- Isolator base Ø 60mm
- Isolator base Ø 100mm

02/ ISOLATION DISCS

Beech wood isolation discs to upgrade Exoteryc and Prestige racks. *Wood box included on the price.

- 4 units
- 8 units
- 12 units

03/ ISOLATING BASES FOR INDIVIDUAL ELECTRONICS

- 4 units
- 8 units
- 12 units

04/ SPECIAL TURNTABLE PLATFORM

- AF I
- AF II

05/ DAMPERS

- Standard (1,4kg)
- Standard (1,4kg)
- MKIII (3,8kg)
- DP 20 (12,5 kg)

06/ DECOUPLING DISCS

- Improved base
- Prestige base
- Exoteryc base

07/ PLATFORMS AND SHELVES

- Floor platform treated glass
- Turntable platform treated glass
- Floor Krion platform (5,6cm bicolor, darkgrey, light grey)
- Turntable Krion platform (5,6cm bicolor, darkgrey, light grey)
- Floor Krion platform (4,4cm darkgrey)
- Turntable Krion platform (4,4cm darkgrey)
- AIRE platform
- Glass Shelve

08/ STAINLESS STEEL PLATFORM FRAME

09/ CARBON FIBER ARMS UPGRADE

10/ CABLE LIFTERS

ISOLATION BASES

Isolation bases adjustable on height to enhance the sound performance of any audio component (Speakers / Turntables / Electronics...) Exchangeable bases made out of Teflon, Neoprene or Beech wood depending on result desired. Available on different diameters, 100 mm Exoteryc Base / 60mm Prestige Base / 30mm Isolator base.

Bases come with screw-in adapters (must be specified) 4mm / 6mm / 8mm

ISOLATION DISCS

Upgrade for our isolation discs in Beech Wood
Upgrade for our isolation discs on Exoteryc and Prestige racks

ELECTRONIC BASES

Upgrade for our isolation discs in Beech Wood Support each of the electronic components (without any need for shelves). Easy installation facilitated by an elastic insert wich provides stability to place electronic components on the adjustable spikes.

Upgrade for our isolation discs on Exoteryc / Prestige / Aire platform

ACCESORIES RACK

DAMPERS

Dampers are **anti-magnetic** and shock absorbing masses that act **against vibrations** generated in electronic components. These could be from power sources (transformers) and could also be a consequence of the ondulatory movement of sound as it bounces back off the furniture and cabinets housing electronic equipment. These air-borne vibrations cause interference and background noise that are detrimental to the listening experience.

With digital reader sources, dampers act as "armour" against radiofrequency signals and other types of waves, and consequently reduce vibrations. When dampers are installed in all electronic components of a sound system, **clearer and more defined sounds are achieved across all frequencies.**

The anti-vibration action of the dampers is equally effective with any other kind of unit from our range.

Dampers provide an extra control across the whole passband. They should be considered as the final touch in **achieving clarity, tone and coherence in sound reproduction** on room acoustics.

STANDARD damper

IMPROVED damper

MK-III damper

DP 20

DECOUPLING DISCS

The objective in our products is absolute **neutrality in sound reproduction.** To obtain our goal, we have created the DECOUPLING DISCS, made out of Teflon, Neoprene or Beech wood depending on result desired.

These products **isolate** the Artesanía Audio Racks from **any type of external coming from solid transmission.**

EXOTERYC BASE and PRESTIGE BASE are coming with damping pads that could make a difference in the sonic behavior of the racks and overall sound performance of the audio system.

IMPROVED base

PRESTIGE BASE

EXOTERYC base

Damping pads included on PRESTIGE and EXOTERYC bases.

White damping pad
Insulating effect, but not absorptive or damping. They don't increase the overall absorption coefficient from the cabinet. (most common used in case the room has been acoustic treated)

Black damping pad
The black bases are made of neoprene, with absorbent or damped effect. They increase the overall absorption coefficient from the cabinet. (most common used in case the room has not been acoustic treated)

PLATFORMS Available floor turntable

SPECIAL TREATED BLACK GLASS PLATFORM

Exoteryc version dimensions: **72,5 x 57 cm** (supports **200 kg**)

Prestige version dimensions: **70 x 55 cm** (supports **200 kg**)

Stainless steel anti-magnetic structure supports a specially treated base to set up a turntable or other components.

Adjustable decoupling needles for leveling platform.

TURNTABLE KRION PLATFORM

Available only for Exoteryc Rack.
Dimensions: **74,5 x 60 cm** (supports **200 kg**)
It's made of **two-thirds natural minerals** (ATH-Aluminium trihydride) and a low percentage of high resistance resins.

Adjustable decoupling needles for leveling platform.

CARBON / KEVLAR / KRION MULTILAYER PLATFORM

Available only for Master Rack also floor platform version.
Dimensions: **85 x 67,5 cm** (supports **200 kg**)
It's made of Carbon Fiber, G-10 Biaxial Glass Fiber 180 g/m², Carbon Fiber and Krion.

FLOOR PLATFORM

Available in 2 versions: **74,5 x 60 cm / 70 x 55 cm** (each model supports **200 kg**).
*Special versions upon request.
Maintains structural resonance point below 6,5 c/s.
Damping pads included. Neopreno and teflon depending on room acoustics

ACCESORIES RACK

ACCESORIES RACK

AIRE PLATFORM

- ISOLATION DISCS**
Support each of the electronic components (without any need for shelves). Easy installation facilitated by an elastic insert which provides stability to place electronic components on the adjustable spikes.
- TEFLON CILINDERS**
Support the internal structure and isolates from the external structure. (Diameter 38 mm)
- DECOUPLING BASE**
Stainless steel discs support the spikes of the uprights. Two types of floor pads are included, with different sonic behavior, depending on the room acoustics. Check manual to use the proper pads for the bases.
- LINEAR ARMS**
Arms made from anti-magnetic stainless steel. The arms hold adjustable spikes (can be located in different positions) also support isolating discs and damping pads. Total flexibility in different positions and easy to change. This system allows to set up the best support position to place electronic components.
- INTERNAL SUSPENDED STRUCTURE**
Isolated from external structure. Eliminates vibrations that are transmitted from solid and acoustic sources through the creation of decouples; steel needles supported on isolating discs. These provide extra tiers of anti-resonant protection. This suspended audio rack has a triple decoupling.

SDS Suspended Double Structure tech
 3D Triple Decoupling
 AAT Acoustic Anti-ressonance Treatment
 MNS Maximum Neutrality System

GLASS SHELVES

SHELVES
While other companies search for solid materials with good anti-vibrational response, Artesania Audio has developed **racks without shelves and totally isolated**. The result is that the electronics generate sound behaviors as were initially preconceived. The materials used have natural high frequencies. The combination with the cushioning material achieves the resonance amplitude is very low, even with very high dynamic range (90 db). **The shelves are supported by polyamide insulating discs** and pads neoprene maximum absorption and blocking features (preventing possible movements of horizontal traslation). **The discs are supported on adjustable steel needles, located on the metal racks** (to decrease transmission). We placed four needles support because the mass of the equipment is not uniform. Regardless of this fact, in case that for aesthetic reasons or the electronics measuring less than 11 cm wide, our company has shelves as well.

Types of shelves:

TREATED GLASS SHELVES available for EXOTERYC and PRESTIGE racks.

KRION SHELVES available only for EXOTERYC racks.

ARTESANÍA AUDIO

the high end rack company

“ Artesania Audio means exceptional quality and technology ”
(ALTA FIDELIDAD, Spain)

“ Parasitic noise disappears completely and a beautifully clean sound is the result ”
(HAUTE FIDÉLITÉ, France)

“ Artesania racks extract every last drop of potential from the components it supports ”
(HAUTE FIDÉLITÉ, France)

“ The perfect rack? There are no shelves to flap about under your equipment, its arguably the best
equipment support known ”
(HI-FI NEWS, UK)

“ Artesania Audio wants components to sound like themselves (in mechanical isolation), Blue Moon
Award for Rack ”
(SIXMOONS, Switzerland)

“ Incredibly neutral, the overall solidity and control of my system, Most Wanted Component award ”
(STEREO TIMES, USA)

“ Music Sounded bigger, better recorded, you could hear more into the recording and the frequency
extremes were as effortless and natural as the mid-band ”
(HI-FI +, UK)

“ The Artesania Rack possesses the ability to improve the overall sonic performance of any separate
component or system as a whole ”
(ENJOY THE MUSIC, USA)
