

Concert Element 50

Hi-fi Bookshelf Speakers

Concert Element 50 is built on the same principle that runs through the entire Concert Element range: the circular driver module extends beyond the shallow cabinet, placing the driver at the centre of the design rather than inside it.

At bookshelf scale, that principle produces a speaker that genuinely fits the shelf it is named for – and genuinely performs in the room it inhabits.

A 2-way architecture with bespoke SB Acoustics drivers and nettle fibre cones, tuned to this specific cabinet volume. Pair it with the amplifier you choose.

Key Features

True bookshelf – Speakers that fit on the shelves they are named after.

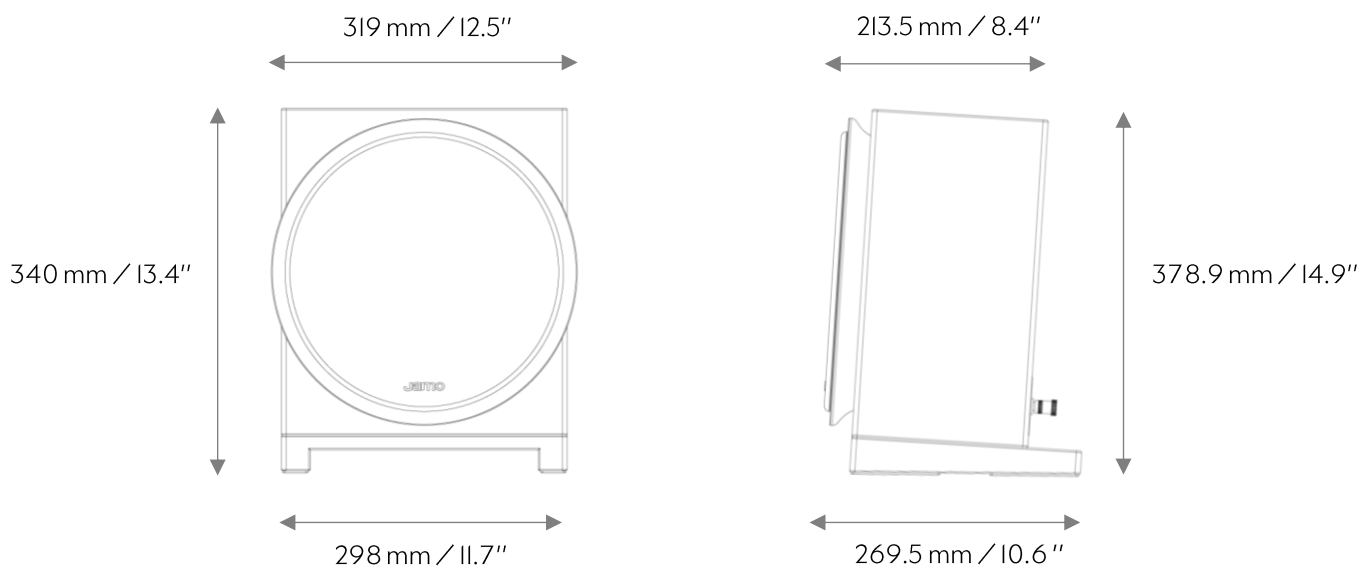

Bespoke drivers designed in Denmark – Nettle fibre cones on 165 mm midwoofer.

25 mm soft dome tweeter with Waveguide – Balanced precision and smoothness for increased airiness and detail.

Down-firing port tube – Flexible placement, no compromise in audio quality.
