

PRO-10-GS

10" GROUND STAKE
FOR KLIPSCH PRO SERIES
LANDSCAPE SATELLITES
Part #1063447

EASY, TOOL-FREE INSTALLATION

The PRO-10-GS ground stake is design specifically for tool-free installation of the Pro Series Landscape speakers. With a built-in directivity aid arrow, and a simple 45°-turn satellite installation and locking method, the Pro-10-GS allows for one of the easiest installation experiences in the landscape speaker market today.

ADDED SECURITY

The included galvanized steel 7" security plate gives integrators or users the option of added security and stability when installing the PRO-10-GS ground stake, keeping the Pro Series Landscape Speakers secure, stable, and level throughout the seasons. An included set screw enables locking of the satellite to the stake, for even further security in commercial or high traffic residential environments.

RUGGED, ALL-WEATHER DURABILITY

Construction from rustproof, high impact, glass-filled ABS, the PRO-10-GS 10" ground stake provides exceptional durability and weather resistance in even the most severe conditions.
