

SKYE POWER CABLE

DESCRIPTION

- Rhodium Rh45 plated pure copper plugs for optimum conductivity and contact strength
- Large cross-section OFC-4N conductors with a STAR structure: 6 concentric stranded conductors around a central solid core conductor for perfect signal transfer and velocity.
- Double shielding for perfect insulation against electromagnetic and radiophonic interferences (RFI & EMI); optimal cotton fibre to limit micro-vibrations inner, peripheral insulation in paper strip and thick PVC on the outside.
- Conductors screwed directly to the connectors without tinsolder, minimizing impedance and ensuring perfect current transfer.

SPECIFICATIONS

Finish : Black Pearl – flexible and smooth texture
 Power socket : 1 x Schuko type power socket
 Connector : 1 x 3-pole connector IEC-C15
